## MOVEABLE FLAIL

(heavy type)

### STANDARD EQUIPMENT

- three-point hitch
- rear rubber protection
- front protection with galvanised strips
- gearbox with internal freewheel
- cardan shaft
- cardan protection boot
- rotor with toothed hammers
- belt transmission
- rear height-adjustable roller with scraper
- internal counterframe
- series of internal counter-elements
- rear galvanised harpoons
- double acting piston for lateral displacement
- special powder or liquid painting (primer and enamel)

The TLSP flail is a tool used for the shredding of grass and branches, for the pruning of vineyards, orchards and olive groves. It has a three-point hitch and can be applied to crawler and wheeled tractors. The TLSP flail is characterised by hydraulic displacement (max 40 cm) that allows it to be used in a decentralised position for crop row tasks.
